Reference Answer Key

Subject: Deep Learning | 10 questions | 2 marks each

Instructor reference document. Each numbered answer corresponds to the same numbered question in the student answer sheet.

Q1. Explain deep learning. [2 marks]

Answer:

Deep learning is a subset of machine learning that uses neural networks with many layers to learn from data.

Q2. Explain neural network. [2 marks]

Answer:

A neural network is a model inspired by the human brain that processes data through layers of interconnected nodes.

Q3. Explain training data. [2 marks]

Answer:

Training data is the dataset used to train a machine learning model.

Q4. Explain testing data. [2 marks]

Answer:

Testing data is the dataset used to evaluate the performance of a trained model.

Q5. Explain machine-learning model. [2 marks]

Answer:

A model is a system that makes predictions or decisions based on data.

Q6. Explain regression. [2 marks]

Answer:

Regression is a machine learning task used to predict continuous values.

Q7. Explain label. [2 marks]

Answer:

A label is the correct output or target value associated with input data.

Q8. Explain data mining. [2 marks]

Answer:

Data mining is the process of discovering patterns and useful information from large datasets.

Subject: Deep Learning | 10 questions | 2 marks each

Q9. Explain algorithm. [2 marks]

Answer:

An algorithm is a step-by-step procedure used to solve a problem.

Q10. Explain prediction. [2 marks]

Answer:

Prediction is the process of using a trained model to estimate unknown outcomes.
